## **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

### ***Allowable Subject Matter***

1. Claims 1, 2, 4-13 and 15-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The applicant's inventions of claims 1 and 12 are geared toward a mobile agent system for a communication unit of a communication system. The mobile agent of claim 1 includes at least one mobile agent; a migration control means for controlling the migration behavior based on the current migration policy that defines the way the mobile agent system checks current network parameters; and a policy control means operating to overrule the selected current migration policy with a user command when the user command defining the current migration policy is received. The closest prior art is WEISER (see rejections based upon WEISER in prior office actions). Although WEISER discusses "room-level policies" and "internal policies", and these "policies" acting as filters to enforce the rules within the "policies", Weiser fails to teach or suggest a mobile agent system including at least one mobile agent; a migration control means for controlling the migration behavior based on the current migration policy that defines the way the mobile agent system checks current network parameters; and a policy control means operating to overrule the selected current migration policy with a user command when the user command defining the current migration policy is received. It is further noted that the applicant's claim 1 is not rendered obvious or anticipated by the document cited by applicant on 3/26/2004 entitled "An Intelligent Mobile Agent

Art Unit: 2682

Framework for Distributed Network Management.” While this prior art does include some of the subject matter contained in the applicant’s claim 1, at the least it does not include the subject matter of a policy control means operating to overrule the selected current migration policy with a user command when the user command defining the current migration policy is received. Furthermore, no other prior art as been discovered that would anticipate or render obvious the claims. Therefore, the applicant’s invention of claim 1, when considered as a whole, is neither taught nor suggested by the prior art. Lastly, since independent claim 12 closely parallels, and includes substantially similar limitations as, independent claim 1, claim 12 is allowable for the same reasons as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
